MAVENIR™

Trust the Future

One Network. Any Cloud. All Software.

Corporate Overview

BUILDING THE FUTURE OF NETWORKS WITH CLOUD-NATIVE SOFTWARE THAT RUNS ON ANY CLOUD AND TRANSFORMS THE WAY THE WORLD CONNECTS.

POWERING DIGITAL AND NETWORK TRANSFORMATION

A proven expert in network transformation, Mavenir helps CSPs transform network economics by embracing disruptive and innovative technology and business models, delivering service agility, flexibility and velocity and driving NFV evolution to achieve web-scale economics. Mavenir's cloud native, web-scale architectures foster new service models, open interfaces, and rapid innovation across the entire network.

Mavenir offers fully virtualized 5G-ready cloud-native software solutions across every layer of the mobile network stack, bringing cloud technologies to telecom.

Mavenir is building the future of networks, focusing on the vision of a single, software-based automated network that runs on any cloud. As the trusted partner to customers around the globe, Mavenir is transforming the way the world connects — realizing new services and the promise of 5G and beyond.

Trust the Future
One Network. Any Cloud. All Software.

MAVENIR AT-A-GLANCE

#1 🌐
MESSAGING PROVIDER

AND APPLICATIONS

RECOGNIZED FOR FIRSTS ACROSS THE ENTIRE PORTFOLIO OF SOLUTIONS:

vEPC
1st Commercially Deployed vEPC (Brocade)

Legacy Messaging
1st SMS Message Sent (1992)

VoLTE
1st Commercially Deployed VoLTE (Metro PCS - 2012)

1st Virtualized VoLTE (TMO – 2014)

OpenRAN
1st Deployment of Containerized OpenRAN (Turkcell – 2020)

VoWiFi
1st Commercially Deployed IMS-Based VoWiFi (TMO – 2011)

1st Virtualized VoWiFi (TMO – 2015)

RCS
1st converged IP messaging (AT&T – 2012)

1st commercially deployed RCSe (DTAG)

1st Commercially Deployed RCS5 (Metro PCS – 2012)

1st Virtualized RCS (TMO – 2015)

DISRUPTIVE TECHNOLOGY THAT POWERS THE EVOLVING TELECOM MARKET

Fully virtualized, 5G-ready, cloud-native software solutions

Leader in OpenRAN initiatives worldwide

#1 NFV/IMS vendor in market share

Largest Rich Communications Service carrier vendor

Cutting-edge AI deployments process billions of records daily

Modernize core functions with MAVcore – Achieve service acceleration and flexible deployment options while increasing revenue opportunities and reducing operating costs with cloud-native architecture using artificial intelligence (AI).

> Voice & Video | Converged Packet Core | Multimedia Messaging
> IP Multimedia System (IMS) & Connectivity Control

Deploy cost-effective, innovative, and nimble infrastructure with MAVair – Enable mobile network automation and web-scale agility with 2G/3G/4G/5G, end-to-end, fully virtualized, software-based solutions.

> Open vRAN | Multi-Access Edge Computing (MEC)

Realize new sources of revenue and protect existing assets with MAVapps – Launch new services, monetize already deployed assets, and defend against threats and fraud with virtualized services.

> Digital Enablement | Enhanced Security | Mobile Enterprise | Multi-ID

Deploy customized private networks and ensure security with MAVedge – Enable secure private networks distributed at the edge and powering a digital marketplace.

> Private Networks | CBRS | OnGo

Modernize business communications with MAVbiz – Provide omni-channel interactions with mobile-native business communications.

> Unified Communications and Collaboration | Business Messaging | Contact Center

Enable seamless cloud deployment with MAVscale – Enable seamless cloud deployments and drive fast delivery of new services, while improving automation with integrated AI & analytics.

> Webscale Platform | AI & Analytics

WHY MAVENIR
INNOVATOR AND LEADER

Mavenir leverages experience and expertise in virtualization, automation, and cloudification to deliver solutions for next-generation networks. Mavenir supports interoperability with every major product and vendor.

GLOBAL OPERATORS ARE MAVENIR CUSTOMERS
